

For Immediate Release

## **INJECTECH, LLC ANNOUNCES THE RELEASE OF THE ASSORTED COMPONENT SAMPLE KIT.**

Injectech, LLC has finished development of their sample kit. The kit consists of a variety of luers, tube-to-tube connectors, threaded fittings, plugs, spikes and check valves. The materials represented consist of nylon, ABS, polypropylene, polycarbonate, radiation stable polycarbonate, lipid resistant radiation stable polycarbonate and PVC. The components are intended for tube sizes ranging from 1/32" (1 mm) to 1/4" (6 mm).

"The Injectech sample kit is a valuable tool for any Engineering or R&D Department." states company representative Dave Splett. "It allows individuals to test tubing fit and material compatibility without having to order samples from numerous places. Our new materials, non-animal derived polypropylene and Kynar, are represented within the kit as well."

Injectech is a leading manufacturer of injection molded components and assemblies for the OEM medical device industry. We build our reputation every day on high quality products, flexibility, unequalled customer satisfaction and responsiveness at a fair price.
